Art Unit: 2871

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 16, 19, 20, 28, 29, 31, 35, 36 and 39 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 of U.S. Patent No. 6,327,010.

Claims 16, 19, 20, 28, 29 and 31 stand rejected for the same reasons set forth in the last Office action.

Claims 35, 36 and 39 stand rejected for the same reasons set forth on page 2 of the Office action mailed 11/30/04 of the parent application 07/828,904.

Claim 21 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 21 is allowable because none of the prior art of record discloses or suggests the combination of an electrooptical system having a structure as recited in claim 19 *with the twist angle β being essentially 0 degree*.

Art Unit: 2871

Claims 34, 37 and 38 are allowed because none of the prior art discloses or suggests a twisted nematic layer having a parallel edge alignment and a twist angle of $0^\circ \leq \beta \leq 100^\circ$ that satisfies the conditions (1), (2), (3) or (4) and one or more compensation layers being based on a twisted nematic liquid crystal, the twist angle β' of one or more compensation layers having essentially the same absolute value but the opposite rotational sense as β , and the director of the LC molecules and the optical axes of the one or more compensation layers forming an angle of 30° to 150° at the surfaces of the second substrate.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
